GROUND IMPROVEMENT
CONTRACTING COMPANY

"Building Strong Foundations for a Better Future

INTRODUCTION

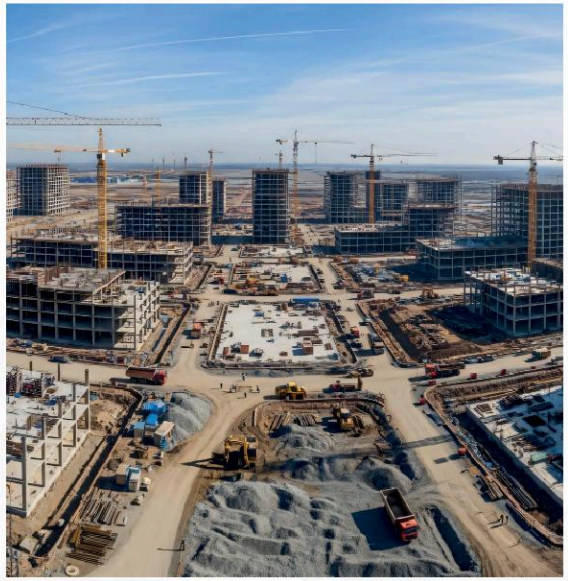

Ground Improvement Contracting Company is a specialized firm delivering integrated engineering solutions across infrastructure, civil works, and electro-mechanical systems. The company relies on strong technical expertise and practical experience to execute projects efficiently while maintaining high engineering standards.

The company is committed to delivering innovative and sustainable solutions that meet diverse project needs, while continuously improving performance to ensure client satisfaction and long-term success.

ABOUT THE COMPANY

Ground Improvement is a growing company in the contracting sector, offering a wide range of services including soil improvement, construction works, landscaping, and electro-mechanical services. The company was established on strong engineering principles to deliver reliable solutions that meet project requirements.

With a team of experienced engineers and skilled technicians, the company ensures high-quality execution and professional delivery while building long-term client relationships based on trust and credibility.

WHO WE ARE

We are a team of engineers and skilled technicians specialized in delivering integrated engineering and construction solutions. We work collaboratively to achieve the highest standards of quality in every project we undertake.

We believe that success depends on proper planning and precise execution, which is why we focus on delivering professional services that meet client goals and ensure long-term sustainability.

VISION & MISSION

We aim to become a leading contracting company by delivering innovative engineering solutions that align with modern market demands. Our goal is to strengthen our position through successful project execution that reflects our commitment to quality and professionalism.

Our mission is to provide high-quality services based on best practices while focusing on client satisfaction and delivering real value in every project.

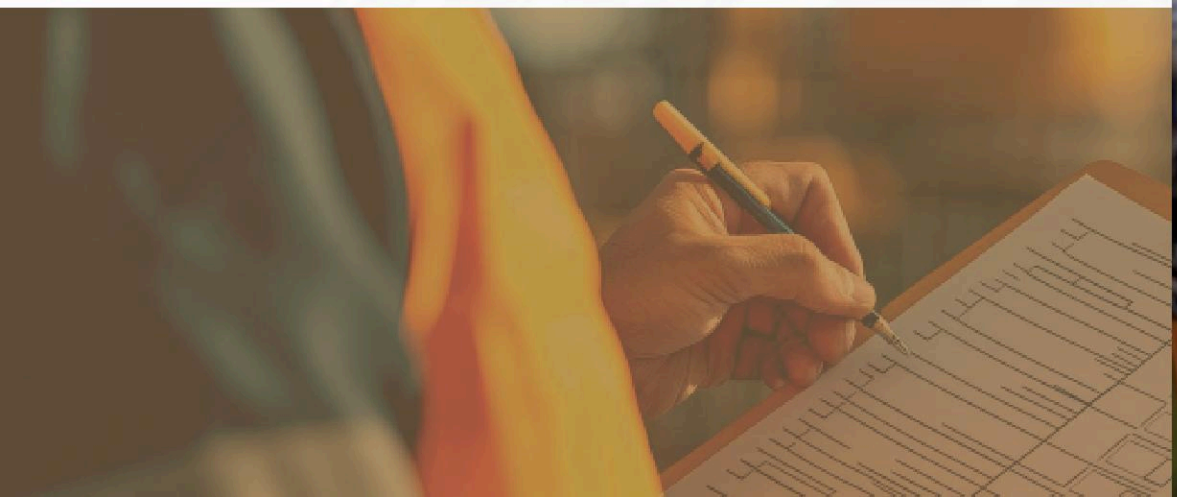

WHY CHOOSE US

Ground Improvement stands out for its ability to deliver projects efficiently by combining technical expertise with modern equipment and advanced techniques. We ensure timely execution while maintaining high quality standards.

We are also committed to safety in all project phases, ensuring professional execution that meets client expectations and builds long-term trust.

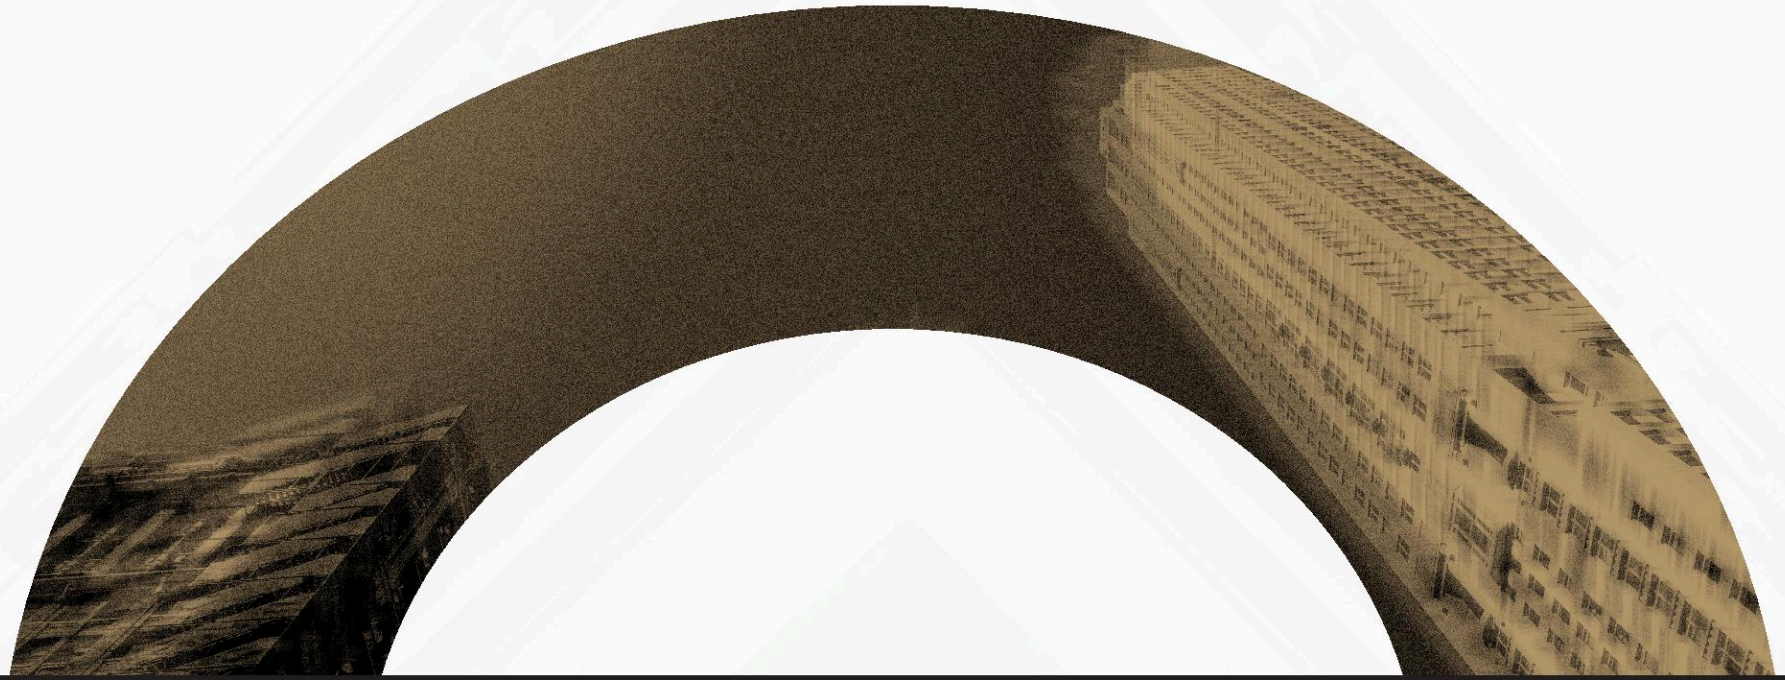

OUR SERVICES

The company provides a comprehensive range of services covering all contracting fields, from site preparation to final project delivery, while maintaining quality at every stage.

Our services include soil improvement, earthworks, concrete works, finishing, as well as electrical and mechanical services, allowing us to deliver complete solutions for various projects.

SOIL IMPROVEMENT

Ground Improvement specializes in advanced soil improvement solutions aimed at enhancing soil stability and increasing load-bearing capacity, ensuring safe and reliable foundations for various projects. Our methods are carefully selected based on soil conditions and project requirements to achieve optimal performance.

Our soil improvement services include advanced techniques such as High Energy Impact Compaction (HEIC), Rapid Impact Compaction (RIC), Dynamic Compaction (DC), Vibro Compaction (VC), Dynamic Replacement (DR), Vibro Replacement (Stone Columns), and Rigid Inclusion, all executed with precision to improve soil performance, reduce settlement, and ensure long-term stability.

EARTHWORKS & ASPHALT

Our earthworks services include all site preparation activities such as excavation, grading, compaction, and backfilling. We ensure precise execution to prepare the site for construction efficiently. In addition, we carry out asphalt works using modern equipment to guarantee high-quality results.

We follow strict quality standards to ensure durability and long-term performance, helping reduce maintenance costs and improve operational efficiency for all projects.

CONCRETE WORKS

We execute all types of concrete works including foundations, footings, and structural elements, while adhering to engineering designs and standards to ensure strength and durability. We use high-quality materials and modern techniques for precise execution.

We focus on efficient execution while maintaining safety and quality throughout all stages, ensuring long-lasting and reliable structures.

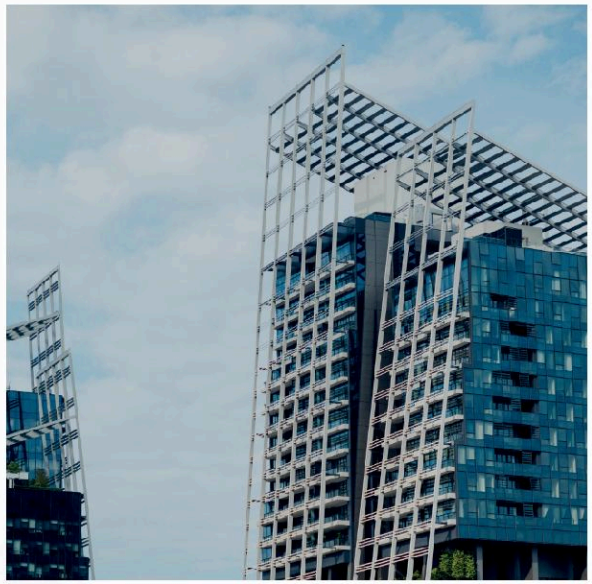

BUILDINGS & FINISHING

We provide complete building construction services from structural works to final finishing, ensuring high-quality execution at every stage to deliver a fully integrated project.

We pay great attention to finishing works as they define the final appearance of the project, ensuring precision and professionalism in every detail.

We also ensure the use of high-quality materials and modern construction techniques to achieve durability and long-lasting performance, while meeting both functional and aesthetic requirements.

Our finishing scope includes interior and exterior works such as plastering, painting, flooring, ceilings, and decorative elements, all executed with attention to detail and consistent quality standards.

LANDSCAPING & IRRIGATION

We design and execute landscaping works including green areas and modern irrigation systems, enhancing the overall appearance and creating attractive environments.

We carefully select suitable plants and systems based on project requirements to ensure sustainability, easy maintenance, and optimal aesthetic results.

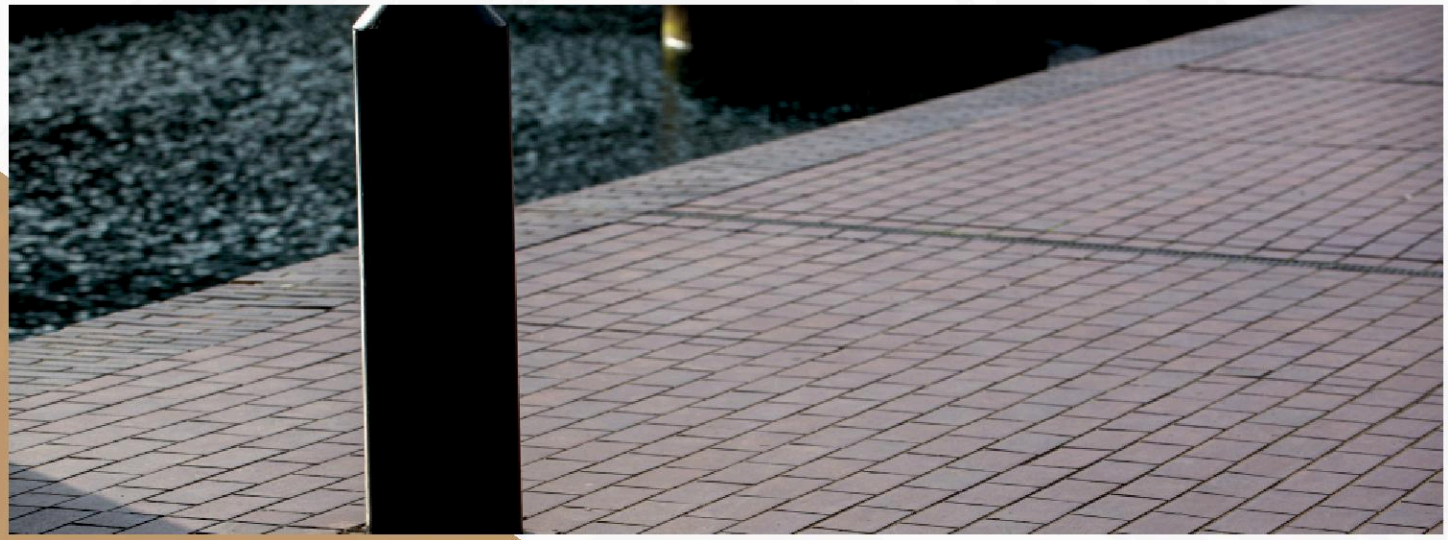

PAVEMENT WORKS

We execute pavement and interlock works for walkways, roads, and various projects while ensuring high quality and durability.

We use high-quality materials and ensure precise execution to withstand loads and environmental conditions, providing long-lasting performance.

We also follow proper site preparation and compaction processes to ensure a stable base layer that enhances the strength and lifespan of pavement works.

Our scope includes interlock paving, curbstone installation, and finishing works, all carried out with attention to detail and consistent quality standards.

ELECTRICAL WORKS

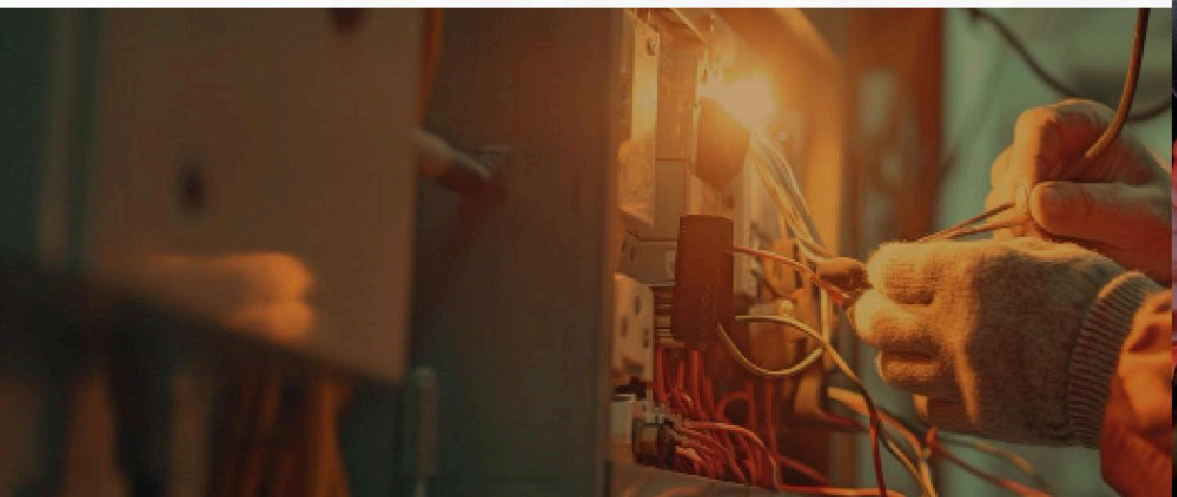

We provide complete electrical services including installation, wiring, and maintenance, ensuring safety and efficiency in all systems.

Our specialized team executes work according to modern technical standards, ensuring reliable and efficient electrical performance.

We also ensure proper system design and load distribution to achieve optimal performance and energy efficiency, while complying with safety regulations and project specifications.

Our scope includes power distribution systems, lighting installation, cable routing, and electrical panels, all executed with precision and consistent quality standards.

MECHANICAL WORKS

Ground Improvement provides advanced mechanical services, particularly in pipeline infrastructure and installation. Our scope includes pipe transportation, installation, and welding using advanced techniques to ensure high precision and quality.

Our services include Pipe Welding, Pipe Bending, pipeline installation using Side Boom equipment, pipeline testing, and Horizontal Directional Drilling (HDD), ensuring efficient execution in line with international engineering standards.

EQUIPMENT & CAPABILITIES

The company operates with modern equipment that supports efficient and fast project execution, along with a skilled workforce capable of handling various project types.

We continuously develop our capabilities to meet market demands, ensuring professional and high-quality project delivery.

HEALTH, SAFETY & ENVIRONMENT

We are committed to implementing the highest health and safety standards across all sites, ensuring a safe working environment and minimizing risks.

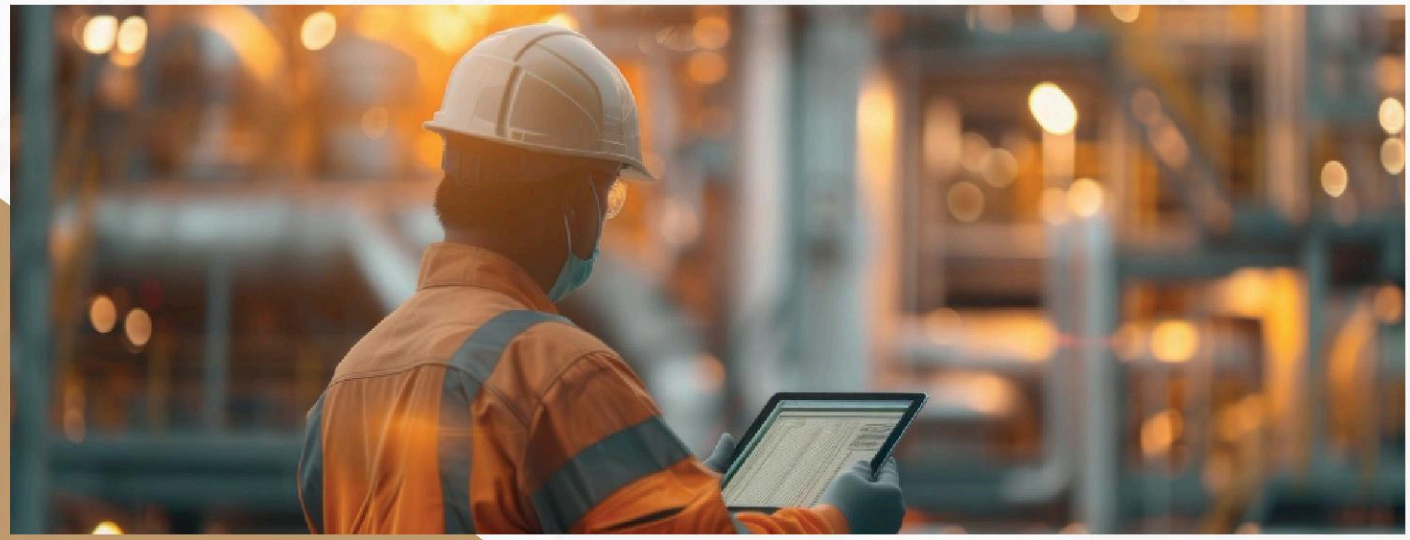

We also follow environmental standards to ensure sustainable project execution and reduce negative environmental impact.

QUALITY & STANDARDS

The company is committed to maintaining high quality standards in all project stages from planning to execution.

We implement strict quality control systems to ensure compliance with engineering standards and client requirements.

PROJECTS & EXPERIENCE

The company has experience in executing various projects across different sectors, delivering integrated solutions that meet client needs.

We continuously enhance our expertise through diverse projects, enabling us to handle challenges efficiently and professionally.

thank you
